TRADE NOTICE

To :

All Trade Bodies / Exporters / Importers

Sub.: Erratic Functioning and Frequent Breakdown of ICEGATE and EDI system causing delay in clearance.

Members of trade are requested to note that since past 2 weeks, there have been repeated instances of breakdown and erratic functioning of ICEGATE / EDI system. This has led to delays in clearance of import and export consignments.

The members are requested to advise the importers and exporter to take up this matter with DG Systems. The below mentioned modules are erratically functioning.

1. Delay in generating SB & BE numbers through ICEGATE, SB and BE numbers are smoothly generated after 9.30 p.m.
2. Public Enquiry Module: The Public Enquiry Module often remain down in the morning hours.
3. ICEGATE system often found working very slow.
4. Amendments are delayed considerably. It takes 4 – 6 hrs for amendments to get completed on the officer's screen.
5. Non-availability of Examination orders along with 1st print of BE/SB
6. Incident numbers are also delayed.
7. E-Sanchit module not functioning properly.

EXPORTS:

One of the major factors affecting exports is the delay in generation of SB due to non-movement of containers from Exporters premises, in case of Factory sealed containers. Due to frequent downtime and slow working of ICEGATE, there is delay in generation of SB number. Unless SB is fed in RFID seal, the export container cannot be dispatched to the port. For Air consignments and LCL export consignments Shipping Bill number is mandatory for offloading of cargo in Custodian premises.

IMPORTS:

In imports, frequent downtime of ICEGATE have resulted in incurring of late filing charges; incurring of demurrage/ detention / storage charges and obtaining OOC. Overall clearance time has increased.

The matter has been addressed with CBIC and Directorate of Systems and we are expecting this issue to be resolved soon. However, till such time, for any delay in clearance of import & export cargo, there should not be any financial liability on Custom Brokers as this situation is beyond the control of Customs Brokers.
